

ELLAH CHANGE TABLE WITH DRAWER

Bag Includes:

- 8 75mm bolts
- 4 100mm bolts
- 2 Spare Barrel Nuts
- 1 Allen Key

IMPORTANT NOTICE

**Changing Table must be correctly assembled.
To prevent falls, do not leave your baby unattended on the changing table!**

ASSEMBLY INSTRUCTIONS – Please read carefully prior to assembly.

Do not over-tighten bolts! Do not assemble the Changing Table in its upright position. It should always be on its side when being assembled.

Note: In the unlikely event of a bolt not winding in easily, a minor adjustment to the alignment of the threaded steel dowel that accepts the bolts may be made with a standard screwdriver.

Failure to follow the Assembly Instructions may cause damage to your Changing Table.

- Step 1:** Lay the end frame on its side when connecting back top rail, then connect the two bottom back lower rails
- Step 2:** Lay the end frame on its back and connect the front top rail to the same end frame, followed by the two front lower rails
- Step 3:** With the rails facing upwards, slide in the three shelves one by one
- Step 4:** After the shelves are fitted, position the opposite end frame and secure with bolts
- Step 5:** Lift Changing Table onto its 4 legs and slide drawer onto its runners, then tighten bolts.

To dismantle the change table, carry out the above procedures in reverse. Failure to do so will cause major damage to the product.
