

STANDARD CHANGE TABLE

Bag includes:

- 12 x 75mm bolts
- 1 x Allen Key
- 2 x Spare Barrel Nuts
- 4 x Castors (pre-fitted)

IMPORTANT NOTICE

**Changing Table must be correctly assembled.
To prevent falls, do not leave your baby unattended on the changing table!**

ASSEMBLY INSTRUCTIONS – *Please read carefully prior to assembly.*

Do not over-tighten bolts! Do not assemble the Changing Table in its upright position. It should always be on its side when being assembled.

Note: In the unlikely event of a bolt not winding in easily, a minor adjustment to the alignment of the threaded steel dowel that accepts the bolts may be made with a standard screwdriver.

Failure to follow the Assembly Instructions may cause damage to your Changing Table.

- Step 1:** Take one end frame and the top shelf and bolt together using 2 x 75mm bolts. The top shelf is designed with two upstands on each side to hold changing pad in position.
- Step 2:** Take the remaining two shelves and also bolt to the same end frame using 4 x 75mm bolts.
- Step 3:** Repeat sequence with the remaining end frame using remaining 6 x 75mm bolts.
- Step 4:** Stand changing table up and make sure all the bolts have been tightened.
- Step 5:** For Meadow and Tuscany Change Tables, only the two safety rails use the additional 4 x 75mm bolts.

To dismantle the change table, carry out the above procedures in reverse. Failure to do so will cause major damage to the product.
